

Super Enterprise Associates LTD (SUPENTA)

6A Greenwich Quay, Unit B
Clarence Road, London, SE8 3EY

Date: 16/01/15

To whom it may concern,

I herewith confirm that Rolf Schroeder worked at SUPENTA from April 1st 2014 to Dec 31st 2014. We are a London-based hardware startup implementing the next disruption in the mobile gaming sector.

During his time with us, Rolf worked not only as Software Engineer but also actively took part in other parts of the product development process. He made valuable contributions, inputs, and suggestions in product design, market analysis, branding while he was also partially responsible for communication with the potential end-users and our suppliers. Furthermore, Rolf was the key contact engineer for one of our hardware suppliers.

As a Software Engineer, Rolf worked on Android platform and developed custom firmware for our hardware. These tasks were performed using Java, C and Python using a variety of tools like Android Studio, Eclipse, IAR Workbench, ST Visual Develop IDE. He ensured high quality by taking part in recurrent code reviews, pair programming and extensive documentation. Rolf setup several automated pipelines and a testing framework.

Towards the end of his time with us, Rolf partly worked remotely. We use several cloud collaboration tools (BitBucket, Asana, Evernote) allowing our team to be smoothly connected and work together flexibly. He works trustworthy and autonomously remotely too and we could rely on him to finish the job properly with his effective attention to details.

Sincerely yours,

Dr Amir Shadmand
CEO, SUPENTA
